

# Nanocharacterization Platform

## A Nanocharacterization Platform Unique in Europe

- About 80 researchers working on the platform
- 40 State-of-the-art equipment
- 3000 square meters of laboratories
- 3.5 M€ investment every year
- An average 3 Patents on nanocharacterization and material analysis placed every year
- About 60 publications every years in the most prestigious peer-reviewed journals.

## Comprehensive Nanocharacterization Experties

- Electron Microscopy
- Ion Beam Analysis
- Optical Techniques
- Sample Preparation
- Scanning Probe Microscopy
- Surface Analysis
- X ray Analysis
- Magnetic Resonance
